

Unconditional Basic Income

The end of work as we know it?

Business breakfast hosted by the Institute for Politics and Society in cooperation with the European Liberal Forum on the 31st October 2017.

Pavel Kysilka, Economist and Founder of 6D Academy (Czech Republic)

Jan Van Cauwberghe, Studecentrum Albert (Belgium)

Niklas Mannfolk, SFP, ALDE (Finland)

Moderator: **Jan Klesla**, Deputy Head of the Economic Section, Lidové noviny (Czech Republic)

- Will **artificial intelligence and automation** cause the end of work in today's form and will the solution to it be a Universal Basic Income (UBI)?
- Is this indeed a system of redistribution in the society of the future, or rather a possible **transition model** to facilitate the onset of the Fourth Industrial Revolution?
- What are the **historical roots** of basic income?
- Is **the financing** for basic income for everyone feasible for?
- Thinking within the UBI framework and when is such an income **unconditional** and when it becomes **universal**?
- How could the basic income work in the **example of Belgium**?
- Is this model even **feasible** for a state of our size?
- The pros and cons that emerged in the **Finnish pilot project** on UBI.
- What methods are used to verify the **feasibility** of basic income at different levels?
- What is the relationship between the **social security system** on the one hand and the idea of basic income on the other? Is it not just about reforming and can it replace it?
- What would be the **consequences of introducing** not only from a financial but from a social point of view?
- An alternative **conditional income model based on education**- could it be a solution and motivation for requalification of a large part of the population?
